

Question	Answer	Marks												
1(a)(i)	1 mark per point to max 2 <ul style="list-style-type: none">• All of the characters/symbols that the computer can use/represent• Each character has a unique number/binary number/hexadecimal number	2												
1(a)(ii)	1 mark for each character set to max 2 , 1 mark for difference <ul style="list-style-type: none">• ASCII• Extended ASCII• UNICODE• ASCII has 7 bits whereas UNICODE has 16 bits• Extended ASCII has 8 bits whereas UNICODE has 16 bits• ASCII has 7 bits whereas extended ASCII has 8 bits• Unicode can represent more characters than ASCII/Extended// by example• Extended ASCII can represent more characters than ASCII	3												
1(a)(iii)	1 mark per point to max 2 <ul style="list-style-type: none">• Can use run-length encoding• Identifies groups of repeated characters ...• ... replaces them with a one copy of the character and the number of times it occurs	2												
1(a)(iv)	1 mark per point to max 2 <ul style="list-style-type: none">• None of the original data can be lost / deleted• The (text) file would be corrupted // the (text) file cannot be opened	2												
1(b)	1 mark for each correct value <table><thead><tr><th>Statement</th><th>Answer</th></tr></thead><tbody><tr><td>The hexadecimal value 11 represented in denary</td><td>17</td></tr><tr><td>The smallest denary number that be represented by an unsigned 8-bit binary integer</td><td>0</td></tr><tr><td>The denary number 87 represented in Binary Coded Decimal (BCD)</td><td>1000 0111</td></tr><tr><td>The denary number 240 represented in hexadecimal</td><td>F0</td></tr><tr><td>The denary number –20 represented in 8-bit two's complement binary</td><td>1110 1100</td></tr></tbody></table>	Statement	Answer	The hexadecimal value 11 represented in denary	17	The smallest denary number that be represented by an unsigned 8-bit binary integer	0	The denary number 87 represented in Binary Coded Decimal (BCD)	1000 0111	The denary number 240 represented in hexadecimal	F0	The denary number –20 represented in 8-bit two's complement binary	1110 1100	5
Statement	Answer													
The hexadecimal value 11 represented in denary	17													
The smallest denary number that be represented by an unsigned 8-bit binary integer	0													
The denary number 87 represented in Binary Coded Decimal (BCD)	1000 0111													
The denary number 240 represented in hexadecimal	F0													
The denary number –20 represented in 8-bit two's complement binary	1110 1100													

Question	Answer	Marks								
2(a)	<p>1 mark for each correct description</p> <table><tr><th>Step</th><th>Description</th></tr><tr><td>$PC \leftarrow [PC] + 1$</td><td>Address in PC is incremented</td></tr><tr><td>$MDR \leftarrow [[MAR]]$</td><td>The data in the address held in the MAR is copied to the MDR</td></tr><tr><td>$MAR \leftarrow [PC]$</td><td>The contents of the PC are copied to the MAR</td></tr></table>	Step	Description	$PC \leftarrow [PC] + 1$	Address in PC is incremented	$MDR \leftarrow [[MAR]]$	The data in the address held in the MAR is copied to the MDR	$MAR \leftarrow [PC]$	The contents of the PC are copied to the MAR	3
Step	Description									
$PC \leftarrow [PC] + 1$	Address in PC is incremented									
$MDR \leftarrow [[MAR]]$	The data in the address held in the MAR is copied to the MDR									
$MAR \leftarrow [PC]$	The contents of the PC are copied to the MAR									
2(b)	<p>1 mark per point to max 5</p> <ul style="list-style-type: none">• Check for interrupt at start/end of an F-E cycle• Priority is checked• If lower priority than current process continue with F-E cycle• If higher priority than current process ...• ... state of current process is / registers are stored on stack• Location/type of interrupt identified• Appropriate ISR is called to handle the interrupt• When ISR finished, check for further interrupts (of higher priority) / return to step 1• Otherwise load data from stack and continue with next F-E cycle (of process)	5								

Question	Answer	Marks
3(a)	1 mark for each correct value	3

Question	Answer	Marks												
3(b)	<p>1 mark for group name, 1 mark for appropriate description</p> <p>e.g.</p> <ul style="list-style-type: none">• Input and output of data• Takes an input from the user // outputs the character of the binary number• Arithmetic operations• Perform addition and subtraction• Unconditional and conditional instructions• Move to another instruction (identified by a label)• Compare instructions• Compare the result to another value	4												
3(c)	<p>1 mark for each correct line</p> <table><thead><tr><th>Instruction</th><th>Result</th></tr></thead><tbody><tr><td>XOR 11110000</td><td>01111101</td></tr><tr><td>OR 01010101</td><td>00111101</td></tr><tr><td>AND 11111111</td><td>11111111</td></tr><tr><td></td><td>11000010</td></tr><tr><td></td><td>11001101</td></tr></tbody></table> 	Instruction	Result	XOR 11110000	01111101	OR 01010101	00111101	AND 11111111	11111111		11000010		11001101	3
Instruction	Result													
XOR 11110000	01111101													
OR 01010101	00111101													
AND 11111111	11111111													
	11000010													
	11001101													

Question	Answer	Marks
4(a)	<p>1 mark for identifying task, max 2 for each description Max 2 for only identifying tasks without descriptions</p> <p>e.g.</p> <ul style="list-style-type: none"> • Memory management • Controls the movement of data between RAM, processor, VM etc • allocates memory to processes • File management • Creates files/folders • Renames file/folders • Security management • Creates accounts/passwords • Provide /upgrade firewall / anti-malware • Hardware management • Receives data from input devices ///sends data to output device • Use of device drivers • Process management • Decides which process to run next • supports multitasking 	4
4(b)(i)	<p>1 mark per point to max 2 for each</p> <p>Back-up</p> <ul style="list-style-type: none"> • To make a copy of data at regular intervals • So that if it is lost/corrupted it can be retrieved <p>Defragmentation</p> <ul style="list-style-type: none"> • Make individual files occupy contiguous blocks // move free space together • Improve disk access times // Data/files can be loaded faster 	4
4(b)(ii)	<p>1 mark from</p> <p>e.g.</p> <ul style="list-style-type: none"> • Compression software • (Hard) disk formatter • Virus checker • Disk analysis software • Disk repair software 	1

Question	Answer	Marks
5(a)(i)	1 mark from <ul style="list-style-type: none"> To stop the data being lost / corrupted / amended To make sure it can be recovered To prevent unauthorised access 	1
5(a)(ii)	1 mark each e.g. <ul style="list-style-type: none"> Install / run a firewall Up to date Anti-virus / anti-malware (Username and) (strong) password Encryption Access rights 	2
5(b)(i)	1 mark each <ul style="list-style-type: none"> Visual check Manually compare the data entered with the original (document) Double entry Enter the data twice and the system compares them to see if they are the same 	2
5(b)(ii)	1 mark each e.g. Range check: <ul style="list-style-type: none"> Make sure it is after and before a specific date // e.g. between 1900 and today's date // check month is between 1 and 12 // check day is between 1 and month end Presence check: <ul style="list-style-type: none"> Make sure the date of birth has been entered Length check: <ul style="list-style-type: none"> Make sure there are at least 1 for day, 1 for month, 2/4 for year // must be 8 characters 	3
5(b)(iii)	1 mark per bullet point to max 2 <ul style="list-style-type: none"> Validation checks data is reasonable/within bounds it does not check that accurate data has been entered Verification checks if the data matches the data given it does not check if the original data is accurate 	2

Question	Answer	Marks								
6(a)	<p>1 mark per point</p> <ul style="list-style-type: none">• Primary key <u>StaffID</u> in STAFF...• ...links to foreign key staffID in <u>DEVICE</u>• One staff member can have many devices• Each device can only be with one member of staff	4								
6(b)(i)	<p>1 mark for each correctly completed statement</p> <pre>SELECT COUNT (STAFF.StaffID) FROM STAFF INNER JOIN DEVICE ON STAFF.StaffId = DEVICE.StaffID WHERE STAFF.FirstName = "Ali" AND STAFF.LastName = "Khan";</pre>	4								
6(b)(ii)	<p>1 mark per bullet point</p> <ul style="list-style-type: none">• ALTER TABLE DEVICE• ADD <i>appropriate field name, appropriate data type</i> <p>e.g.</p> <pre>ALTER TABLE DEVICE ADD Returned Boolean;</pre>	2								
6(c)	<table><tr><th>Normal Form</th><th>Description</th></tr><tr><td>First Normal Form (1NF)</td><td>No repeating groups or repeating attributes</td></tr><tr><td>Second Normal Form (2NF)</td><td>All attributes must be fully dependant on the (composite) primary key // No partial dependencies</td></tr><tr><td>Third Normal Form (3NF)</td><td>All attributes must be fully dependent on the primary key and no other attributes // no non-key dependencies // no transitive dependencies</td></tr></table> <p>1 mark for each correct description</p>	Normal Form	Description	First Normal Form (1NF)	No repeating groups or repeating attributes	Second Normal Form (2NF)	All attributes must be fully dependant on the (composite) primary key // No partial dependencies	Third Normal Form (3NF)	All attributes must be fully dependent on the primary key and no other attributes // no non-key dependencies // no transitive dependencies	3
Normal Form	Description									
First Normal Form (1NF)	No repeating groups or repeating attributes									
Second Normal Form (2NF)	All attributes must be fully dependant on the (composite) primary key // No partial dependencies									
Third Normal Form (3NF)	All attributes must be fully dependent on the primary key and no other attributes // no non-key dependencies // no transitive dependencies									

Question	Answer	Marks																																													
7(a)	<p>1 mark for each section</p> <ul style="list-style-type: none">• A AND B• NOT C AND B // B AND NOT C• XOR (with remainder correct and bracketed and nothing extra) <p>X = (A AND B) XOR (NOT C AND B)</p>	3																																													
7(b)	<p>1 mark for first 4 rows, 1 mark for second 4 rows (shaded)</p> <table><tr><th>A</th><th>B</th><th>C</th><th>Working space</th><th>X</th></tr><tr><td>0</td><td>0</td><td>0</td><td></td><td>1</td></tr><tr><td>0</td><td>0</td><td>1</td><td></td><td>1</td></tr><tr><td>0</td><td>1</td><td>0</td><td></td><td>1</td></tr><tr><td>0</td><td>1</td><td>1</td><td></td><td>1</td></tr><tr><td>1</td><td>0</td><td>0</td><td></td><td>1</td></tr><tr><td>1</td><td>0</td><td>1</td><td></td><td>1</td></tr><tr><td>1</td><td>1</td><td>0</td><td></td><td>1</td></tr><tr><td>1</td><td>1</td><td>1</td><td></td><td>0</td></tr></table>	A	B	C	Working space	X	0	0	0		1	0	0	1		1	0	1	0		1	0	1	1		1	1	0	0		1	1	0	1		1	1	1	0		1	1	1	1		0	2
